PROFILE SUMMARY

Motivated B.Tech Artificial Intelligence and Data Science student with a strong interest in programming and technology. Skilled in Python, HTML, and GitHub with a passion for learning and building practical solutions. A quick learner with good problem-solving and teamwork abilities. Seeking opportunities to enhance technical skills and contribute to innovative projects while growing professionally.

PROJECTS

Project Title: Student Management System Using Python

- Developed a Student Management System using Python to manage student records efficiently.
- Implemented features to add, update, delete, and search student details.
- Used file handling to store and retrieve student information.
- Applied functions, loops, and conditional statements to build the application.
- Created a simple, menu-driven interface for easy user interaction.
- **Technologies Used:** Python

Project Title: Simple Calculator Using HTML, CSS & JavaScript

- Developed a responsive calculator application using HTML, CSS, and JavaScript.
 - Implemented basic arithmetic operations such as Addition, Subtraction, Multiplication, and Division.
 - Designed an interactive and user-friendly interface using CSS.
 - Used JavaScript functions and event handling to perform calculations and display results dynamically.
 - Improved understanding of front-end web development concepts and DOM manipulation.
-

EDUCATION

B.Tech - Artificial Intelligence And Data Science , CGP - 8.5, Sriram Engineering College, Anna University, (2023 to 2027)

CERTIFICATION

1. IBM SkillsBuild:

- Artificial Intelligence Fundamentals

- Customer Engagement: Problem Solving and Process Controls
- Customer Engagement: Communication and Personality Dynamics

INTERSHIP

- Virtual Intership Under the Nann Mudhalvan (TNSDC) Initiative at E16 AI XR Technology Pvt.Ltd
- Software Development and Web Development at Mandalo Tech
